Kediri, Jawa Timur

Results-driven Fullstack Laravel Developer with 2+ years of experience in building scalable web applications and digital logistics platforms (Laravel, NestJS, Payment Integration). Strengthened by practical business development exposure, combining strong technical execution with hands-on experience in market research, client pitching, on-site system implementation, and user feedback management to deliver business-aligned software solutions.

Pengalaman Kerja

PT. Antar Global Prospero (AGROS Indonesia) - Gresik, Jawa Timur

Oct 2023 - Sekarang

Fullstack Developer & Technical Business Development

A digital cargo logistics platform providing end-to-end transportation services.

- Core Web Systems: Developed and scaled core web systems for digital cargo logistics using Laravel and NestJS, including the AGROS Associate platform for corporate truck monitoring.
- Payment Integration: Led the technical integration of Bank Indonesia's SNAP Migration (VA Payment Gateway) for BRI and DBS Bank modules using Laravel, implementing repository patterns, encryption, and complex git branching strategies.
- Business & Field Implementation: Conducted market research, delivered product pitch decks to prospective partners, led on-site system onboarding, and managed user feedback as a primary liaison between client operations and the engineering team.

Lavin Technologies - Surabaya, Jawa Timur

Jun 2023 - Sep 2023

Fullstack Developer

A startup engaged in web and mobile applications development, as well as ERP systems.

- Worked in a team to build supermarket management software using Laravel, Electron.js, and MySQL, as well as NestJS and PostgreSQL for ongoing projects.
- Researched goods processing workflows and designed efficient database structures for ERP implementations.

PT. Baracipta Esa Engineering (Beecons) - Yogyakarta, Daerah Istimewa Yogyakarta

Aug 2022 - Dec 2022

Fullstack Developer Intern

A construction & planning consulting firm developing IT solutions for INKINDO.

- Positioned as a team leader managing weekly tasks, sprint planning, and task execution for all team members.
- Developed web applications using Laravel, Bootstrap, and MySQL.
- Communicated directly with clients to report technical progress and discuss ongoing requirement changes.
